My, How Time Flies … RTA IS 98-YEARS-YOUNG

By Jim Gauntt, RTA Executive Director

The oldest operating trade association in the United States is the American Seed Trade Association (ASTA), founded in 1883.

RTA’s predecessor organizations, a loose-knit group of smaller regional interests that came together to form a national association, also date back to the 1880s, according to the lore of our industry. That’s heritage in its own right.

In reading a little further, I found numerous similarities in the purpose and goals of ASTA and other associations like RTA.

These can be condensed to communication and education, training, stewardship of the environment, and becoming an effective voice in all matters related to the development of the products and services for which trade associations are responsible.

In RTA’s very first meeting in St. Louis, Mo., in 1919, Mr. Walter Poleman, president of the Western Tie and Timber Company, gave an address in which he reflected on his own 30+ years in the tie industry.

“The tie men have never expressed themselves [before] and they…owe a duty as fellow citizens, who depend on the transportation system in this country, to give the true facts and the efforts being made [in and] against their own interests.”

At the close of his presentation, the first president of the association, John Fristoe of the T.J. Moss Company, stated, “Mr. Poleman has helped me…realize how important we are to the community.”

Beginning with Poleman’s words, RTA embarked on a journey of advocacy for its members—and railroads—and has never looked back.

RTA has been the united voice for thousands of men and women who came before us and who provided the primary foundation of modern day track systems in daily use by North American rail companies.

I also found the following inspiration from that first meeting in 1919…

Article 3 of the association’s 1919 Constitution and Bylaws set forth principles RTA yet today endeavors to embody:

Purpose of Organization
This Association is organized, not for pecuniary profits in any form, but for benevolent, scientific, and educational purposes. To obtain a closer relationship between the members of the Association, between its members and others engaged in the railroad tie business and with the public at large and also with those who may subsequently become members thereof; to advance, promote, and extend the commercial and manufacturing interests of the various communities where railroad ties are produced; to inculcate just and equitable principles of trade and to improve business standards in…
Cahaba Pressure Treated Forest Products, Inc. is back in the crosstie business, and in a big way! Already the largest single plant producer of wood poles, Cahaba is now a major supplier of hardwood crossties. New processing equipment, new borate dip tank, new tie storage areas, but we kept the same hardworking dedication built on forty years of manufacturing excellence. Our team is here for you. Contact us today for more information.

Go with the Leader

MiTek is no newcomer to the end-plating industry. We have developed and manufactured anti-split plates since the late 1960s. A rock solid design for deep tooth embedment gives our plates what it takes for the long haul. They deliver the best tear-resistance on treated wood crossties in the industry, and have done so for over forty years - over thousands of miles of track throughout North America.

Approved by all Class 1 railroads, they provide superior resistance to splitting and checking, greatly extending the life of crossties, switch ties and bridge timbers.

Need anti-split plates that deliver? Get them from the industry leader...MiTek!

the relations to the civic life of the communities; to establish and maintain the utmost uniformity and fairness in the commercial usages; to acquire, preserve and disseminate valuable business information; to promote friendly intercourse among its members and other tie producers and other commercial and manufacturing interest of the communities and to increase their facilities for an interchange of ideas and also for the purpose of co-operating with other organizations upon important matters affecting the commercial manufacturing as well as civic interests of various communities, the various states and the nations: to avoid and amicably adjust, as far as practicable, all controversies and misunderstandings, arising between individuals engaged in the trade and their customers; to protect and promote generally the interest of railroad tie production and those engaged therein; and to do any and all things which may be necessary and proper to carry into effect the said objects and purposes, and to facilitate in every proper way the transaction of all legitimate business between members and between them and others.

These original guiding principles light our path forward even now. As Fristoe said, occasionally it’s important to take a breath and realize that the work we do as members of the RTA family is important to the community and for the greater good of all.
