DISCLAIMER:  
The Railway Tie Association proudly promotes the products and services of the wood tie industry in general. In so doing, it does not endorse, warrant or guarantee the products and services of any individual Association member versus another, nor does it warrant or guarantee the goods and services of specific members. Any such warranties or guarantees express or implied, are disclaimed. The information in this directory has been provided by the Association members themselves and is reproduced here for the convenience of the members and their customers.

We would like to gratefully acknowledge the companies that support the RTA by advertising on the tabs throughout this directory. Without their support, we would not have been able to publish and distribute this year’s membership directory.

CROSSTIES
TO YOUR SPECIFICATIONS

WE DELIVER THE QUALITY YOU EXPECT... EVERY TIME

Accurate, Measurable and Repeatable
Preservative Retention Levels

Our patented Tru-Core® dual pressure treatment process ensures that the retention levels of Borate and Creosote Petroleum Solution that you specify for your crossties, are achieved and verifiable. Koppers delivers quality you can rely on for every decay zone.

Crosstie Lifecycle Management
Dispose of scrap crossties cost-effectively with environmentally responsible recycling from Koppers.

Koppers Benefits
- Eight strategically located treatment facilities in North America
- Creosote Petroleum Solution (CPS) pressure treated ties or patented Tru-Core® dual treated Borate and CPS ties for extended life in the harshest decay zones
- U.S. Treatment plants are AAR M-1003, ISO 14001 and RC14001 certified

BUILDING GREAT LINES FROM THE GROUND UP™

www.koppers.com
1-888-567-8437

1 Tru-Core® is manufactured under license from Kopp-Coat Inc.
FROM LOGS TO TIES: TRUSTED BY RAILROADS AND MILLS FOR 100 YEARS

Trust and strength have run deep in our roots for 100 years. From multi-generational relationships with our sawmill partners to today’s Tuff-Tie™ Dual Step Borate Treatment, Class 1 and Short Line customers depend on Gross & Janes’ performance. Along the way, we have expanded our procurement footprint into nine states, nurtured our sawmills and increased efficiencies through state-of-the-art processing plants. It all comes together as we consistently meet today’s marketplace demands with the high-quality railroad ties our customers need and the excellent, trusted service they deserve.

Tell us what we can do for you.

Chemonite® ACZA Crossties have been put to the test in severe, challenging locations

In an effort to judge the effectiveness, strength and longevity of ties treated with Chemonite® ACZA preservative, ties were installed in active railroad tracks in several different locations. Chemonite® ACZA ties installed 8-years ago recently underwent an inspection to determine if they can still be used in service.

- Harsh test locations include a Georgia test facility as well as tracks in use:
  - Southwest Florida
  - Southeast Georgia
  - East Central North Carolina

The tie performance is outstanding with no major biological deterioration.
EVERYTHING YOU NEED FROM CREOSOTE TO CuNAP

IWT/Moldrup is trusted in over 1000 Turn-key treatment installations across the globe, exclusively represented in North America by American Wood Technology.

ASK US ABOUT OUR TURN-KEY SOLUTIONS

AWT offers handling systems, dip tanks, plant controls, rail bridges – everything for your wood treating equipment needs.

**Geographical Area Served:** Worldwide  
**Products Produced or Sold:** When you’re facing a real rail challenge, trust GREX to have a real rail solution. As a Loram company, GREX is working on the latest innovations in inspection and material delivery. Aurora® has set the standard for tie inspection, scanning the surface of wood ties and assigning grades. Aurora Xi™ takes inspections even further, using backscatter x-ray technology to look inside wood ties. Our tie marking solution utilizes data from these machines to make it easy for tie gangs to identify faulty ties. Once ties in need of replacement have been identified, the GREX Tie Setout solution will distribute replacement ties exactly where they are needed. BallastSaver® can calculate deficiencies in your ballast profile and automate ballast delivery when integrated with GateSync® software and Solaris® gates. The versatile SlotMachine® and self-powered SPS® work platforms can be used for a wide variety of maintenance tasks. And DumpTrain® and DumpTrain for Curves® can offload ballast with precision at up to 2,000 tons per hour.

**Contracting or Consulting Services:** Since 1969, Herzog has been a leader in the construction, operations, and maintenance of rail infrastructure throughout North America for railroads and transit clients. Focused on safety, quality, and innovation, Herzog brings the latest specialized technology to our clients for MOW equipment, positive train control, survey/data management, and rail flaw detection.

**Special Equipment or Manufacturing Services:** Herzog offers a full suite of specialized MOW equipment to increase the speed of railroad maintenance with increased versatility and safety. Our fleet of 5,000+ specialized railcars and hi-rail equipment is entirely designed and built in-house for services ranging from ballast distribution, rail handling, tie unloading, ultrasonic rail testing, and right-of-way survey. The Multi-Purpose Machine® performs a variety of tasks including crosstie, OTM, and rail handling; ditching; vegetation cutting; snow removal; and PTC, signal, and communications infrastructure installation. Our self-mounting CarTopper® machine also provides crosstie and OTM handling while riding atop railcars. Additional MOW equipment leasing options include our GPS ballast trains, Automated Conveyor Train, rail trains, Rail Unloading Machine, Automated Tie Down Car℠, and the ProScan LiDAR Truck.

CROSSTIE LIFECYCLE

THE ENVIRONMENTALLY RESPONSIBLE SOLUTION FOR CROSSTIE TREATMENT AND RECYCLING.

From raw timber and dual pressure treatment of new crossties to scrap tie collection, transportation and recycling, Koppers’ Lifecycle Management program will optimize your crosstie performance, risk management and environmental compliance with effective cost control.

In the Beginning - Crosstie Treatment

- Patented Tru-Core® dual pressure treatment process (Borate and Creosote)
- Accurate, Measurable and Repeatable Preservative Retention Levels
- Eight strategically located treatment facilities in North America
- U.S. treatment plants are AAR M-1003, ISO 14001 and RC14001 certified

At the End - Recycling/Fuel Processing

- Timely collection reduces the liability, safety, and environmental risks of stockpiling scrap ties
- Proper documentation of recycling/disposal to meet environmental regulations
- Energy recycling typically costs less than landfills

Koppers provides the quality solutions to cover all your crosstie needs... from beginning to end!

BUILDING GREAT LINES FROM THE GROUND UP.™

www.koppers.com
1-888-567-8437
Tru-Core® is manufactured under license from Kop-Coat Inc.
Quality Products From A Name You Can Trust

With 50+ years of wood preservative treatment experience, we offer Mainline, Branch Line and Industrial Grade crossties with creosote or creosote/borate dual treatment. We also have CCA, CuNap and Penta treatments available should the need arise. Combining this with dependable service and a commitment to quality throughout each process creates crossties you can rely on.

Visit our website, www.CahabaPressure.com, and give us the opportunity to build a long-term relationship to help you Stay On Track!
